Planning, designing, developing, Branding, Advertising & Digital Marketing Strategies

We're a team of experienced, creative and hard-working designers headed by talented professionals who concentrates on results. Neither we are an international agency nor a agency with multiple layers of management, but we produce graphic and website designs which are effective and liked by the crowd.

Earthing System Study

Earthing System Audit Services

This audit service ensures that the earthing system functions as intended. It includes a visual inspection of the system, testing of the system, and a report on the findings. The audit is performed by a team of experienced engineers and technicians.

- Visual inspection of the system
- Testing of the system
- Report on the findings

Enhanced Power Quality Study

Power quality has become a significant concern for industrial, commercial, and residential customers as they seek to improve the reliability and efficiency of their power systems. Power quality issues can lead to equipment failure, increased energy costs, and safety hazards. Our Power Quality Services are designed to identify and resolve these issues, ensuring a reliable and efficient power supply for your business.

- **Power Quality Services are:**
 - Fast Onsite and Western signature analysis of power quality issues.
 - Voltage sag detection from upstream or downstream.
 - Measurement of total and individual voltage and current harmonics up to the 12th order.
 - Measurement of Common Mode Voltage (due to VFDs) and other EMC issues.
 - Measurement of both harmonics and the rate harmonics.
 - 24/7 remote monitoring of 20 Hz or 80 Hz.
 - Voltage sags detection from upstream or downstream.
 - Measurement of total and individual voltage and current harmonics up to the 12th order.
 - Measurement of Common Mode Voltage (due to VFDs) and other EMC issues.
 - 24/7 remote monitoring of 20 Hz or 80 Hz.

Advantage of Data Power Quality

- Long time experience in the field, with extensive data to back up our claims.
- In-house instrumentation, software, and simulation tools.
- Team members with extensive experience and knowledge in power quality.
- Ability to perform on-site, in-lab, and remote monitoring.
- Ability to provide comprehensive reports and recommendations.

Our Power Quality Services are

- Conduct on-site or remote power quality studies and provide recommendations for improvement.
- Provide 24/7 remote monitoring of power quality issues.
- Provide 24/7 remote monitoring of power quality issues.
- Provide 24/7 remote monitoring of power quality issues.

Grid Integration Power Quality Measurements

With increasing large and distributed power plants, renewable energy, and distributed energy resources, the grid is becoming more complex. This complexity leads to various power quality issues, including voltage sags, flicker, and harmonics. Our Grid Integration Power Quality Measurements service is designed to identify and resolve these issues, ensuring a reliable and efficient power supply for your business.

Integration of these challenges can be achieved by:

- The addition of distributed energy resources (DER) to the grid.
- The use of advanced power quality monitoring and control systems.
- The use of advanced power quality monitoring and control systems.
- The use of advanced power quality monitoring and control systems.

Grounding Design

Our grounding design services ensure that your power system is safe and reliable. We provide comprehensive grounding design services, including the design of grounding systems, the installation of grounding equipment, and the testing of grounding systems. Our services are designed to ensure that your power system is safe and reliable, protecting your business and your employees.

Electrical Earthing Systems

- Provide a safe and reliable power supply.
- Protect your business and your employees.
- Ensure compliance with all applicable regulations.
